

Cesar Lopes de Mendonca

Date of birth: 25/08/1981

Nationality: brazilian

Address: u dubu E348, Zadni Treban 26729, Czech Republic

Phone number: +420 601 565 906

Email address: cesar.beloca@tutanota.com

Profile

Innovative Software Developer skilled in creating fresh, modern designs.
Problem-solver successful at collaborating with technical teams to deliver attractive and engaging results.

Work experience

02/2023 – 09/2025

Prague, Czech Republic

Junior Software Programmer Styrax

In **Styrax**, I implemented code for a benefits card application with versions in several countries. The work included coding **Java** in **Jakarta EE** primarily creating **SOAP** services to map values to be stored in database but also retrieve data using **SQL** and **HQL**. I also dealt with **Azure**, **Kubernetes** and **Git** to version the project. Implementation were always tested using **WildFly**, **Docker** and **SoapUi**. I was always expected to refer to the application plans written by our analyst in **UML** language.

I also worked briefly as a **JavaScript** and **React** developer and tested frontend applications using **JUnit**.

09/2022 – present

Prague, Czech Republic

Angular Developer Freelance

- I started my Angular journey by being accepted by Unicorn for a paid workshop in September 2022.
- In 2024 I built a website for massage parlor **PEMAB** from Slovakia - pemab-app.web.app. Implementation was fairly lean, but included use of **transloco** to make the web multi-language. The web was deployed with **Firebase**. The web was created using **CI/CD**, so that the client could constantly follow the development work
- In 2024 I also created a website for Brazilian podcast **EMPREENDIDELAS** - empreendidelas.web.app. Here it was exciting to plan the website to that episodes would be displayed directly on the website from YouTube.

Education

12/1999 – 12/2007

Belo Horizonte, Brazil

Media | Media UFMG - Universidade Federal de Minas Gerais Computational Media.
